

Little Mullet Key, Big Mullet Key, and Cottrell Key Wildlife Management Areas

Little Mullet Key WMA decreases disturbance of nesting, roosting, and foraging birds. Shallow seagrass flats around the island exhibit light prop scarring.

Big Mullet Key WMA decreases disturbance of nesting birds, including great white heron, a variety of other wading birds, and mangrove terrapins. Some of the shallow seagrass flats around the island exhibit light prop scarring.

Cottrell Key WMA decreases disturbance of wading birds and mangrove terrapins. This is the only island in the Lower Keys and Marquesas regions where brown pelicans nest. Shallow seagrass flats around the island exhibit light prop scarring.

Marquesas Region

This map contains proposed marine zone alternatives for public comment. Proposed marine zone alternatives do not reflect agency decision at this time. For more details about the proposed alternatives and zone descriptions, including associated regulations, see Section 3.3 and 3.4 of this DEIS.
